Information about the Basic package

BASIC

596 lines of code for security software

Software Contract code validation confirmation

Website with full set of token features and links

Solidity software MIT certification

Infrastructure and DeFi platform setup

Social media setup and growth planning

Prospektus Holder Team

596 lines of code for security software

A token structure based on 596 lines of encoding data that is secure and team reviewed and audited 

Software Agreement Code

Validation and security checked processing and integration of the validation audit of the codings written for the token

Website

A website study with token related roadmap, whitepaper and all other plugins installed

Certificate

The MIT license is one of the most widely used free software licenses. Created by the Massachusetts Institute of Technology in 1988, the MIT License is one of the most widely used free software licenses. It allows the codes released under the MIT License to be used in proprietary software if that software also distributes the license. It is also compatible with the GPL.

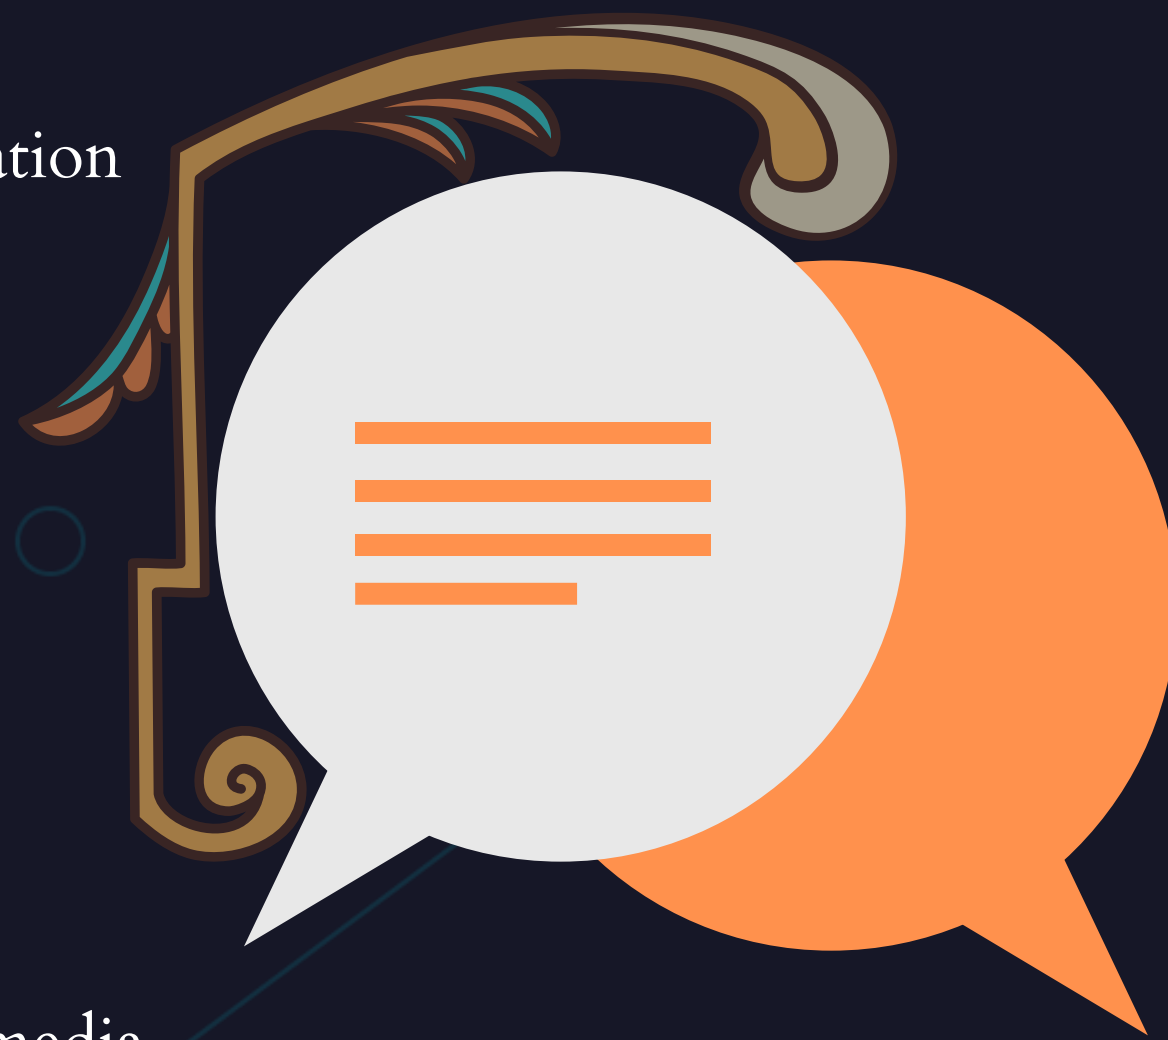

Infrastructure

Supporting the development of the "x" token by designing an integrated installation with Defi platforms and an R&D study with DE-FI farms and pools

Social Media

Continuous behind-the-scenes support for growth efforts by supporting social media accounts with advertising budget
