Prospektus Holder Team

Percentage Ecosystem

For token features, a % deduction is made for each trade and distribution to all "x" token holders is automatic. In this regard, all token holders holding “x” tokens in their wallets can earn by keeping their staking features in their wallets without any action.

Listing on Coinmarketcap and Coinecko

An intensive study is carried out on the listing on Coinmarketcap and Coingecko, with an intensive study on all the coding elements and similar graphical studies in the background of the "x" token, studies on the adaptation process to all platforms are detailed. Current detailed information on the listing criteria of Coinmarketcap and Coingecko is carried out.

Youtube - Twitter-Influencer-Package

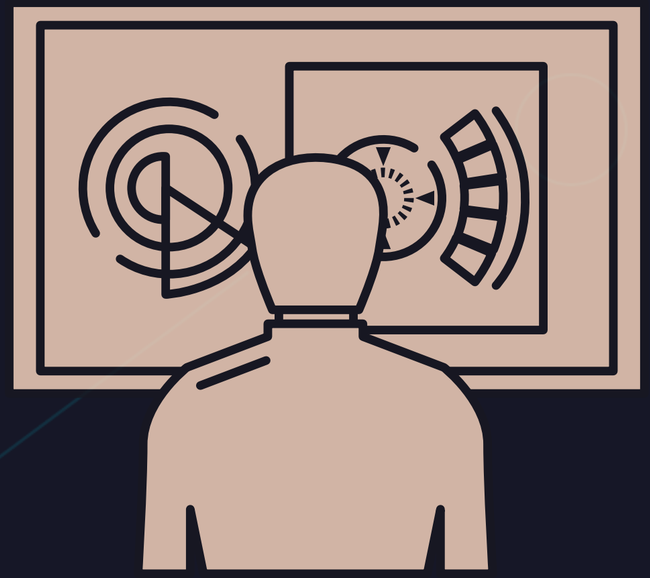
With the Youtube and Influencer package, the primary goal will be to highlight the "x" token among influencers on Twitter, Youtube and other social media platforms in all social networks with video and airdrop etc.

6-month process service

As a prospectus holder team, there will be detailed graphical studies of the "x" token in the background, active and up-to-date contributions to the ICO process, advertising campaigns and social media platforms. Detailed studies and supporting updated details are added as a continuous driving force.

Full deal with crypto advertising agencies

Interviews are conducted with crypto advertising agencies on the topic of advertising, and promotional activities are carried out with the most useful and effective companies. It will partner with the industry's leading Crypto advertising agencies.



Promotional privilege in the Asia region

Including Asian market presence and ad impressions with a separate advertising policy for Asia.

Medium capacity stock market

Medium capacity stock marketAdding another dimension and scope of promotional and R&D activities by listing the existence of the "x" token on one of the medium-sized exchanges, by increasing the number of wallets of the "x" token

1200 lines of code for security software

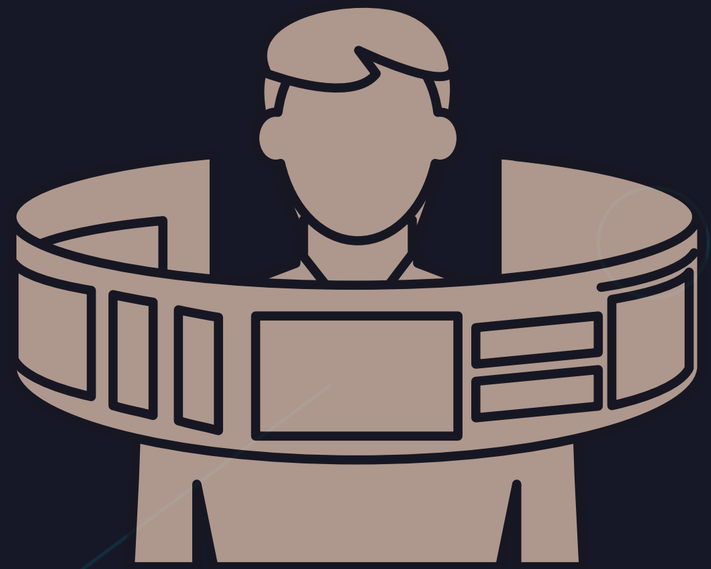
A token structure based on 1200 lines of encoding data that is secure and team reviewed and audited

SolidProof Audit Certificate

A security certificate at SolidProof, a German company and one of the rare companies in the cryptocurrency and cryptocurrency market

Design

Continuously produced design works behind the scenes on logo graphics and trailer work that is completely original and consistent with the team's project values.



Software Agreement Code

Validation and security checked processing and integration of the validation audit of the codings written for the token

Website

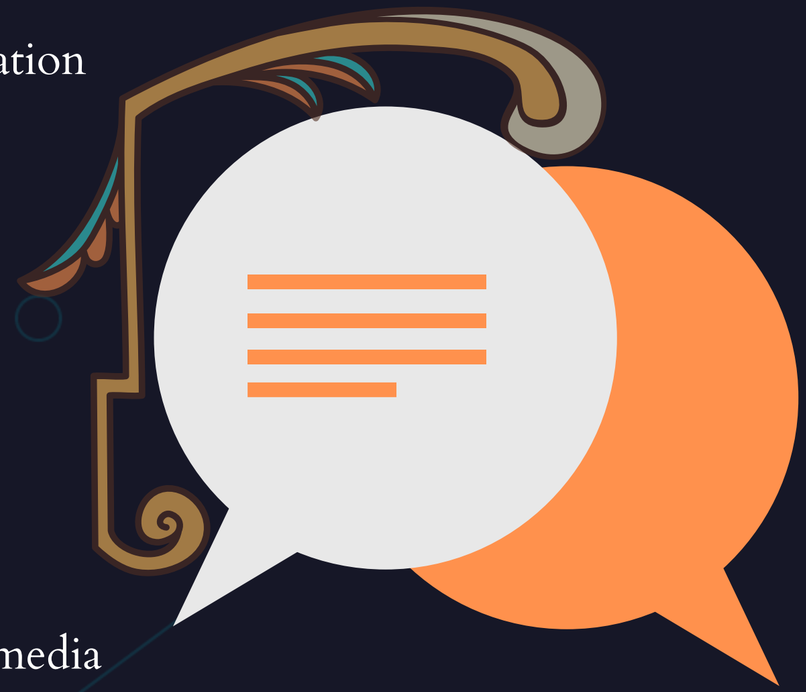
A website study with token related roadmap, whitepaper and all other plugins installed

Certificate

The MIT license is one of the most widely used free software licenses. Created by the Massachusetts Institute of Technology in 1988, the MIT License is one of the most widely used free software licenses. It allows the codes released under the MIT License to be used in proprietary software if that software also distributes the license. It is also compatible with the GPL.

Infrastructure

Supporting the development of the "x" token by designing an integrated installation with Defi platforms and an R&D study with DE-FI farms and pools



Social Media

Continuous behind-the-scenes support for growth efforts by supporting social media accounts with advertising budget
